

portfolio   *angelaberry* design

I started my career working for a design agency in Windsor as a Paste Up Artist.

In 1994 I completed a four year apprenticeship at BPCC Taylowe, BPC Digital Arts and Polestar the Largest independent printing company in Europe producing origination for major blue chip companies such as Mars, Smithkline Beecham, Marks and Spencer's, & Thornton's. During this time I also attended the London College of Printing where I achieved a City and Guild's in Printing and Origination.

In 1994 I re-trained on the Barco system
In 1996 I became a Barco Manager in Watford and again re-trained on the Applemac systems using standard applications such as Quark, Freehand and Photoshop where I continued producing artwork for blue chip companies such as BT and Tamron.

In 2004 my family commitments led me to go freelance where I have been successfully working with local companies producing artwork and websites for small to medium businesses in the Berkshire area.

Appleberry Care is a wholly owned subsidiary of **Nursery Staff Ltd**, a company established in 1998 to provide child carers to support families, childcare establishments and schools in the local area.

Appleberry Care is a Domiciliary Care Agency registered with the Commission for Social Care and Inspection (CSCI) and we specialize in working with children and young adults with disabilities and additional needs.

Our care workers are recruited to a high standard and are qualified and/or experienced in caring for children and young adults (the 'service users') with additional needs.

All our staff are individually interviewed and must be able to provide references and have an enhanced police check (CRB check). Those who are required to take the children out in their own car must have a full clean driving licence and have insurance (business insurance) which covers them to take the 'service users' out.

The Agency is run by two members of staff - Lisa Vaughan and Cheryl Higgins. Lisa Vaughan owns and manages the agency on a day to day basis and Cheryl is generally responsible for the service user assessments and the training, supervision and development of staff.

All care staff are trained to a high specification. Training

Partnership Human Resources

Home

At phr we specialise in helping you to focus on your key business objectives by supporting you with those HR related tasks that might otherwise distract you temporarily from the bigger picture

Many companies struggle to decide on the level of Human Resources support they should have. They might want high calibre, experienced people who are able to input into the strategic planning of the organisation but there are the administrative and day to day situations that also need addressing

With our experience of operating at many levels in blue chip organisations, we can help you to concentrate on your core competencies, and those areas of your business you feel most passionate about, by being on hand for you to transfer some of your people related processes to us

When your resources are stretched too far, or you simply do not have enough time to devote to a project or assignment, we can help by managing this on your behalf. We seek to provide support, skills and pragmatic advice when and where necessary. For further information, see our list of services at the bottom of this page

About us

phr was established in 2007 and was set up to provide a fully flexible set of services related to the employee lifecycle

Beverley Youdan, Business owner and founder of phr is a Chartered member of the CIPD who possesses a wealth of HR management experience gained over 25 years in senior roles within large blue chip multi national organisations. She is accomplished in motivating others to achieve personal and overall business goals, firmly believing that good team leadership brings increased standards and ultimately profits

A highly experienced practitioner who has a comprehensive and strategic understanding of HR management, business issues and organisational change

Welcome to our world of cleaning services

Office Cleaning.com Ltd is a successful contracts cleaning company based in Berkshire.

We pride ourselves in our achievements in high standards of office cleaning and our teams of reliable and efficient operating staff. One of the keys to this success is the management of each and every one of our contracts. We adopt a "hands on" approach and by listening carefully to our clients, we tailor each contract to suit individual requirements.

We have an enviable reputation for our high profile clients, more importantly, our ability to retain them year after year. Our success has also been built on solid foundations, with our directors being involved in the every day activities and management monitoring. We do not over stretch the number of contracts per area.

Our friendly and personal approach to clients along with a reliable and high standard of service excellence, completes our success story.

What happens during the first assessment?

I will take details of your horses' full medical history.

A gait assessment will then be carried out. I will be asked walk, trot up, perform dressage movements and back up your horse and depending on the issue, I may expect to see any suspected it may be part of the problem.

After observing your horse in motion I will carry out a whole body assessment (posture). Any necessary adjustments will be explained to you during the treatment.

What Happens After Treatment?

Aftercare is as important as the treatment itself. Although it can be difficult to manage your horse quiet after treatment, the total number of rewards in the long term may need to be adjusted on a case by case basis.

Other Animals

In addition to horses I also treat dogs and cats (and people!) Please call if you require further information or visit:

McTimoney
Chiropractor

nt for Horses

What happens during the treatment?

I will take details of your dogs' full medical history and then carry out a gait assessment where I will ask you to walk and trot your dog in a straight line.

For working dogs e.g. obedience I will ask you to carry out some heel work. If there are particular issues I may ask you to demonstrate that action/activity.

After observing your dog in motion I shall implement a nose to tail assessment and any necessary adjustments will be carried out and explained fully during the treatment.

What Happens After Treatment?

Aftercare is as important as the treatment itself. Although it can be difficult to keep your dog quiet afterwards they will reap the rewards in the long term.

The most important thing is to find the balance between rest and exercise. Aftercare advice will be discussed with you on an individual basis.

Other Animals

In addition to dogs I also treat horses and cats (and people!), please call if you require further information or visit:

CASE STUDY 3663 FIRST FOR FOODSERVICES

Service comes first with end-to-end voice technology solution

About 3663
With 125 million, it is a major player and a modern 150,000 employees has 3 divisions in Logistics.

Requirements
Management at processes and it was particularly that had been in could be prove it technology to be logistics depot in warehouse managed modes.

The Solution
State of the art operation Vocollect Talking WMS to give from goods to free solution into, to the WMS in

Benefits
Implementing a stock move quickly so that employee action and they'll The WMS also all showing the pre stored picked, being delivered administration as what goods are accuracy.

Requirements
• To ensure competitive in a tough marketplace
• To make the best use of time and labour
• To reduce the errors associated with the existing pick and dock labelling system

CASE STUDY palletline

Palletline are going way with the hel and Psion Teklogix

About Palletline
In 1992 Palletline pioneered the introduction of a system for palletised goods, launching the UK with several sites in Ireland and Europe.

Palletline solution from Vigo Software
Vigo Software, a supplier of specialist software pallet companies for 26 years, has won a co signature capture software that will enable Palletline to track the point of delivery across the

The software means that Palletline can now co system that allows deliveries to be monitored from to the point where it is received at its final destination. Palletline operates the UK's original hub and spoke system, a barcode scanning system that first scans a depot within the Palletline network and then to central hub. The pallets are scanned once more way to the delivery depot where they are scan their journey on outbound vehicles to their recipients. Until the delivery of the new proof of delivery, member companies had used a variety of paper Palletline is one of the first company to introduce software – which is a web-based system – to through the supply chain to the point of delivery.

Interestingly, the Vigo solution has been available up has been limited, hindered by the lack of a good market. While the software is compatible with Vigo has recommended that Palletline member (personal digital assistant) from Psion Teklogix.

A sleek, compact and powerful design with robust dual mobile computing device delivering more, enabling a host of advanced mobile applications.

iKON packs incredible functionality into a compact ergonomics, aesthetics, and ease of use. The iKON is the market going 24 hours of use and can image or scanner or use its built-in camera to deal for Vigo and Palletline's needs.

"We have used Vigo's Hub and Traffic software sense to use their signature capture solutions, the whole Palletline track and trace operation director of Palletline.

He continues: "The absence of a rugged had the new software had forced us to delay introduction of the new iKON we have a good perfectly."

"Efficient signature capture and proof of delivery pallet distribution chain and we feel that the new from Psion Teklogix's new iKON hardware will bring huge companies and allow them to make more to the administration burden," he added.

Keith Taylor managing director of Vigo Software, of the final link in track and trace to be completed. day within his handset and apart from its sign enables the Palletline members drivers to photo barcode at point of delivery to ensure that the built in GPS functionality means it is possible it has been left while drivers can communicate a messaging capability.

palletline

CASE STUDY SigmaKalon (PPG)

Coatings supplier as IT covered

our Signature
SigmaKalon (part of PPG Industries) – one of the leading global suppliers decorative, marine, protective and industrial coatings – has invested in £100,000 in mobile data capture hardware and software from Psion Teklogix.

Requirements
SigmaKalon has used Psion Teklogix handheld and tablet computers to capture devices at its Bristol, West Yorkshire manufacturing plant and refurbish facility for some two years now. With the aim of increasing the accuracy of data collection, the speed of data processing and reducing the risk incurred by its current paper-based manual system, the company has

Requirements
• Field operative solution
• One device to suit all needs
• Electronic format

The solution
• Psion Teklogix WORKABOUT PRO G2 mobile computer
• EPOD software from Psion Teklogix
• Service and support from Psion Teklogix
Benefits:
• Cost effective solution with budget
• The WORKABOUT PRO G2 is one device with multiple functions
• Quicker Data transfer

CASE STUDY Thames Valley Police

Thames Valley Police track down their assets with RFID

Requirements
Thames Valley has become the first Police Force in the country to adopt an RFID asset management system. They use WORKABOUT PRO handheld terminals from Psion Teklogix to track equipment used at investigation scenes. By adding a RFID (Radio Frequency Identification) asset tracking system in November 2006 the force have revolutionised the visibility tracking and stock rotation of its equipment used for investigations at crime scenes.

The RFID asset tracking solution was brought to the attention of Keith Henderson, Inspector in Charge of Operations at Thames Valley Police, as a demonstration by Tronair's Police Security Consultant John Macneary, of Mac's Associates. Impressed at what he saw, Keith then turned to solutions company Ascendant Technologies to develop the software and integrate Tronair RFID hardware into the police equipment as well as the WORKABOUT PRO computers from Ascendant Technologies. RFID partner had mobile computer technology company Psion Teklogix, to provide a complete RFID solution. Working with Keith and his team, Ascendant Technologies adapted its tool tracking software, called ToolTag, to make it fit the requirements of Thames Valley Police. By example, using their vocabulary and acronym such as URA (Local Police Authority) and URA (Unique Reference Number).

When an investigation has to be conducted at the scene of a crime or accident, Thames Valley Police sends for its investigation call out vehicles to bring the equipment required for crime scene management. Criminal investigations can require a vast array of equipment, which may include multiple spot lamps and their stands, generators, tents and shovels, is deployed not only to maintain the integrity of the scene to ensure forensic and other evidence can be collected but also to make the scene safe for its visitors, it's the location of a traffic accident.

The Solution in Action
The new RFID system has revolutionised the process. A low frequency RFID tag is embedded in each item of Thames Valley Police's crime scene equipment. Depending on the item the tag is either 25 or 13 mm diameter or for small items a tag the size of a grain of rice is used. Once the equipment has been set up on the scene a member of staff reads each item with another WORKABOUT PRO tag in the van, which means it is now logged as being at the scene.

Given that police investigations can often take place in the middle of the night, perhaps in a field or woods, it is easy for equipment to be misplaced or when the equipment is put back on the van it is read again and this indicates instantly if anything has been left behind. As the items are returned from the van to the store, they are scanned once more and checked to see if they are left for any reason.

The RFID system will also manage all of the mechanical and PAT testing of the equipment, by providing an automated maintenance schedule. Furthermore, the system can run and print reports for jobs that are imminent. With this system, Thames Valley Police has eliminated all of the paperwork previously associated with this process.

Knowing at any time the location of its assets also helps Thames Valley Police to improve their utilisation. "You cannot compare our old system to the RFID system," said an impressed Keith Henderson. "The system works well while the WORKABOUT PRO handheld hand units are very rugged with great functionality."

As Thames Valley Police get used to their RFID system they are already beginning to use other areas where the technology can provide benefits – including registering visited places for the public. Indeed, when it comes to tracing stolen goods, RFID is a compelling solution for all sectors.

Simon Hurd sales manager
"Signatec RFID and the WORKABOUT PRO offer a very powerful solution".
Working on a Windows CE 4.2 platform, the rugged WORKABOUT PRO can incorporate RFID barcoding and GPS, within the same unit.

Requirements
• Tracking Assets: Thames Valley Police
• Computer
• To improve Health & Safety at Work

The solution
• Psion Teklogix WORKABOUT PRO Computer
• Tronair RFID Reader
• ToolTag (tool Tracking software) from Ascendant Technologies

Benefits
• Ability to conform to using TYP Vocabulary
• Improved accuracy and traceability
• Elimination of All Paperwork

FOR PEOPLE IN THE SWIM

ISSUE TWO | SPRING 2006

HappyEaster!

A STAR IS BORN

Wizzo the starfish brought to life by Tokyo swimmer. Congratulations to Holly Miller, aged 9 who swims at the Telkyo School in Wexham for winning our 'name the starfish' competition.

Holly's suggested name Wizzo, was one of 200 excellent and inspirational entries we received. Our team of select judges spent hours in private discussion at Seriously FUN HQ before deciding upon Holly's suggestion.

When asked why she thought Wizzo was the best name for the school mascot, Holly replied, "because the starfish is cool and he can swim real fast!" sounds great we thought and Wizzo was born.

Holly received vouchers to spend at the Fun Junction toy shop in Beaconsfield who specialise in games and learning activities for the young at heart.

Baby & Pre-school parents can swimming equipment through

Happy Nappy: Specially designed schools, the Happy Nappy is very the risk of nappy leaks into the pool (including ours) in England, France made it obligatory for their lessons swim nappy available.

Baby Wrap: Made from soft pliable material, and styled to insulate you. Your baby will be more comfortable so encouraged to relax and enjoy!

REMINDERS

Please make a note of our following policies as they are designed to help your child get the most from their lesson.

Swimming hats • Compulsory at Telkyo & St. Pirans from September 2006!

In response to requests from parents, the schools and our own policies regarding health & safety, all children will be required to wear a swimming hat from September 2006. Our NEW Seriously Fun hats will be available to buy on poolside for just £1. Please ensure you have a swimming hat ready for September.

Long shorts

Please ensure that all boys wear either short swimming shorts or swimming trunks. This enables them to move through the water with less resistance.

Goggles

We recommend that children do not wear goggles as it helps them to build natural water confidence. It also reduces the time spent adjusting goggles during the lesson.

DATES FOR YOUR DIARY

Term dates also available at:
www.seriouslyfun.net

PRIORITY BOOKING DAY

Fri 16th / Sat 17th / Sun 18th / Mon 19th / Tues 20th June

WATER SAFETY LESSON FOR JUNIORS

LAST DAY OF TERM

Fri 21st / Sat 22nd / Sun 23rd / Mon 24th / Tues 25th July

SUMMER HOLIDAY COURSES FOR JUNIORS

Maldenhead & Wexham

Mon 31st July to Fri 4th August & Mon 7th to Fri 11th August

High Wycombe

Monday 14th to Friday 18th August

SERIOUSLY FUN IN HIGH WYCOMBE

Junior holiday courses now at Wycombe Abbey School.

As from this August we will be running holiday courses at Wycombe Abbey School in High Wycombe. We are very proud to have negotiated the exclusive hire of Wycombe Abbey's facilities and look forward to teaching children essential swimming and lifesaving skills at another first class venue.

The prestigious school for girls celebrated the opening of it's brand new 25M six lane swimming pool and sports complex in January 2004. Sir Steve Redgrave, the guest of honour, opened the new EBM building saying that this is one of the best sports and fitness facilities that he had ever seen at a school.

The first 5 day holiday course will run from Monday 14th to Friday 18th August with further courses to follow.

NEW TEACHERS ON BOARD

The new guys.

Name: Robert Carr
(poolside assistant)

Name: Marcus Johns
(poolside assistant)
Where you'll see me: Wexham

Name: Sue Roose (teacher)
Where you'll see me: Maldenhead & Heathrow

Name: Therese Norton (teacher)
Where you'll see me: Wexham, Windsor & Marlow

This term also see the welcome return of Paul Ramsay and Vicky Madden. Paul has been serving in Iraq for the past 12 months so we are glad to have him back safe, sound and as much fun as ever!

Introducing ANGEL STARS™ and a Unique Retail Opportunity

The Angel Stars range of fabulously created and dressed angel dolls/action figures represents a new and unique opportunity to the retail toy and gift sector and your business.

Unique because of the charitable element of the Angel Stars story: every time an Angel Star is sold, a child or person in need will receive the gift of a cuddly and lovable Cherub Star.

PARENTS LOVE THE IDEA

Parents and grandparents love the idea of sharing their gift of giving with someone else in need. They can even help their children and grandchildren to follow where their Cherub Star gift goes, through checking into the Angel Stars website.

CREATE YOUR OWN IN-STORE CHARITY PROMOTION

For more information about how we can help you create your own in-store Angel Stars charity promotion, talk to Fiona Rice right now or contact her at:

Angel Stars Limited Tel: 020 8605 9102
Email: info@angelstars.co.uk Web: www.angelstars.co.uk

ANGEL STARS™

Each of the Angel Stars has an individual personality which is brought to life through a beautifully illustrated and colourful story book which accompanies the Angel Star. This makes the child's experience even more magical.

Angel Stars also represent something entirely different in the toy and gift markets: something that can benefit the retail trade – see over more details.

Stars

Vodafone Music and MusicStation

Our latest music offerings for Vodafone customers

No longer will customers need to rely on MP3's or iPods to play the latest tracks whilst on the move. With the recent launch of MusicStation, exclusive to Vodafone, Vodafone customers can now easily download tracks directly to their mobile.

MusicStation

MusicStation gives customers access up to 1.35 million tracks for £1.99 per week (inc. VAT) and unlimited music to customers who download the MusicStation application to their handset. What's more, customers who subscribe receive the first week free.

- Available on a subscription only basis
- Music is only available for use on the customer's handset whilst subscription is maintained and is not transferable to other media

How to get MusicStation?

MusicStation is downloadable from Vodafone Mobile Internet and is billed through the customers M-Pay account (providing the M-Pay bar has been lifted for the customer).

Vodafone Music

Using Vodafone Music Store (www.vodafonemusic.co.uk), customers can also download up to 15 tracks for just £7.50 per month (or 50p per track) straight to their PC or mobile phone.

- Individual song 99p and albums from £5.99
 - Customer owns all music downloaded
- Customers can also download up to 15 tracks direct to their MP3 or

BlackBerry.

How to find us (map)	

What shall Phase 1 work cost?

Based upon figures provided by our architect and quantity surveyor, and adding in contingencies for inflation and unforeseen costs, we estimate that the Phase 1 project will cost around £150,000, including VAT.

How shall we pay for the work?

Our goal is to fund the work by:

- Launching a **St. Mary's Building Appeal** from the congregation for gift aided donations either in the form of one-off gifts or gifts payable by monthly standing order over a period of up to 3 years. We need to raise at least £75,000 from the Building Appeal.
- St. Mary's PCC has agreed to donate £25,000 from its own working funds.
- We shall be approaching a number of grant making charities that are committed to supporting Grade I listed buildings. Our goal is to raise £25,000 from this source.
- Finally, we shall begin in 2008 to undertake a small number of key fundraising events from which we plan to raise £25,000.

It is our goal to have received sufficient pledges from the St. Mary's congregation by Sunday 14 October that would mean we shall have met or exceeded our Building Appeal target of £75,000.

That will allow us to then finalise the building plans, prepare to go out to tender and approach other funding organisations for their support.

Our objective is to begin the refurbishing work immediately after Easter 2008.

ST MARYS • HITCHAM LANE • BURNHAM • BUCKS

What role will the refurbished building play in the life of St. Mary's?

God has given St. Mary's a clear vision of how we are to be His church. We have been called to "Draw our community into a living relationship with the living God" and our church building has a vital role in our serving God in that vision. It is the place where we gather together to worship the living God. The church building is at the heart of our church community life. It is the place from which we go out to serve Him and our community. It is also the place to which we return time and time again to be refreshed and renewed, and to welcome others who are seeking a new or deeper relationship with the living God.

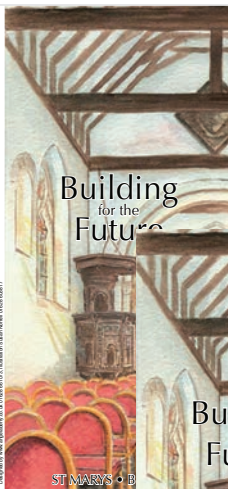

A 21st Century is an indispensable part of our being God's church community at St. Mary's.

Yet, the most inspiring and exciting vision will fail without the means and resources to carry it out. We need both your prayers and your financial support.

The success of raising the funds for the Phase 1 will depend upon the generosity, determination and commitment of the St. Mary's congregation. It is our responsibility to give the lead in this project.

Outside charitable donors will be looking for us to provide the bulk of the funding.

If we are to take seriously God's call upon our lives and as a church community to serve Him, now is the time for us to be ready to walk in new places of sacrificial giving to respond to His call. Will you walk with us? Will you generously support this project?

ST MARYS • B

Three years ago St. Mary's set out to see our church facilities transformed and fit for service in a new century. Many of our facilities are at or near to the end of their working life. We believe that it is our privilege, as the current generation, to see the church fully refurbished, leaving a legacy of a church building fit for future generations.

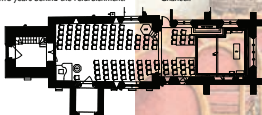

We have identified three key needs for our building:

- To expand our facilities, and increase the church seating capacity. St. Mary's is a thriving church.
- Have flexible facilities, making the best use of our space.
- Have accessible facilities for a new 21st century generation, for the disabled, and for the elderly.

We have consulted widely with the congregation, the Diocese and with many organisations interested in preserving ancient buildings. Our goal has been to preserve the character and beauty of our almost 800-year-old glorious Grade I listed medieval building in such a way as to continue to allow us to build and grow St. Mary's congregation in the 21st century.

We believe that the refurbishment plans retain the beauty of our church's ancient character, while at the same time addressing our three key needs.

We are now ready to begin Phase 1, which is the refurbishing of the church building Phase 2, which will involve expanding the Parish Room into a St. Mary's Centre will be one to two years behind the refurbishment.

What will Phase 1 work involve?

- A new Novel under floor heating system, replacing our forty-year-old boiler and radiators. New heating in the Chancel.
- A new nave floor of large river ceramic tiles, in keeping with our medieval church tiles. The 'New' floor will be level and without any doorway steps or chancel steps.
- Substantial electrical rewiring work and a new lighting system to replace the current pre-World War Two lighting.
- The ground floor of the Tower will become a creche on Sundays with glass doors, and an overflow seating area for special services. The font will be returned to its original position behind the main church door.
- The bells will be rung from a new floor in the Tower, which will double as a quiet prayer space, especially on weekdays.
- High quality chairs, in keeping with the building, will replace the pews. A levelled floor allows Sunday morning seating to be expanded to about twenty rows from the current seventy places in the pews.
- A new audiovisual desk at the rear of the church, with a projector discreetly suspended from the Chancel ceiling and an electronic projector screen hidden behind a Chancel beam when not in use.
- The communion rails will be retained as a feature behind the altar to conceal additional heating for the Chancel.

approved safe to drink.
treatment and treated water is still present in water after water. Calcium goodness is up of limescale from hard Reduce or eliminate build

HOUSETRON

Hardwater limescale preventer

No Maintenance • Simple installation • No wiring needed.

WRAS
APPROVED PRODUCT

Ensures Compliance with Part L' Building Regulations

1 YEAR MONEY BACK GUARANTEE

Installation Instructions.

- No wiring required
- No maintenance once installed
- Installed in fifteen minutes

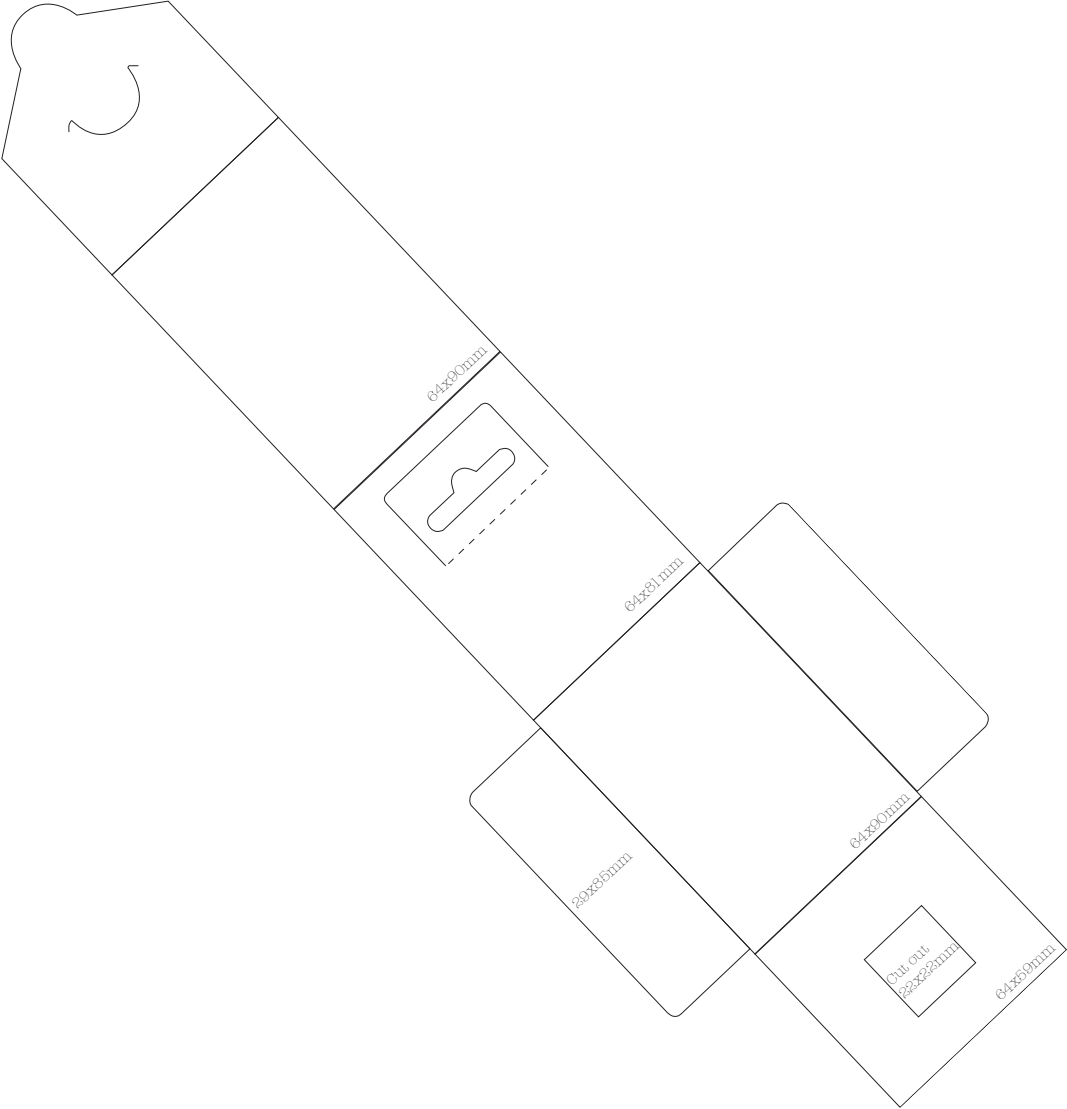

Installation is very simple and can be carried out by any competent pipe fitter. Ensure that supply of water is switched off at the desired fitting location and cut out a length of pipe equivalent to the Housetron. Remove the cut out section and by removing the top nuts of either end of the Housetron replace it in the existing pipework using

the olives provided and ensure it is water tight by using a spanner. Once installed there are no further alterations needed and Housetron will not require servicing.

- Diameter: 15mm (1/2").
- Length: 235mm (9 1/4") including fittings.
- Body: 316L stainless steel non corrosive non reactive housing.
- Fittings: Straight coupling compression fittings for easy installation.
- Weight: 230 grams (incl fittings).

1. Ensure water supply is switched off.

2. Remove pipework the equivalent length of Housetron.

3. Fit Housetron ensuring fittings are tight both ends.
4. Turn on supply slowly.
* Domestic heating compliance guide for hardwater treatment.
